KITCHEN COUNTER TOPS

Innovation

TOP STONE is an engineered quartz stone which consists of 93% natural quartzite excellent for use as a kitchen counter top and work tops in interior settings. The quartzite is mixed with colour pigments, granite grains and effect materials such as broken mirror particles, silica metal or mother-of-pearl inlay to create a unique and unmistakable material. In this way, every TOP STONE work top is created as a unique product.

Quality

TOP STONE is a massive material formed under high pressure and vacuum which is characterized by its own special properties. In comparison to granite TOP STONE is more dense, harder and extremely scratch and wear resistant. Thanks to its acid and stain resistance it is also exceptionally hygienic. TOP STONE is a product which is exceptionally resistant to breakage, remarkably durable and easy to maintain. It is available in slab sizes with a length of 300 cm and a width of 136 cm. Attractive colours and effects, polished, honed or rough surfaces and different edge profile finishes make countless design options possible.

Individuality

TOP STONE kitchen counter tops are finished individually and precisely to measure according to your requirements and information. You select colour, structure, surface and edge profile thickness (1.3 cm to 10 cm). We make our quotation using your measurements and after clarification of all technical details and consideration of your desired changes we produce your TOP STONE kitchen top in the shortest time possible.

TOP STONE kitchen counter tops can be obtained over select kitchen studios, specialised retailers and specialized departments within furniture houses. Whether your kitchen is a new purchase or renovation, with TOP STONE you decide for a very special material that is also suitable for back-splashes, tabletops and can be used as a floor tile. We will gladly inform you about a local dealer in your vicinity.

Eventual variations in colour due to printing limitations.
